- Nuclear Engineering
- Welding Engineering
- and more

NNL Co-op and Internship positions provide a diverse range of competitively paid work assignments and technical opportunities. A comprehensive benefits package includes defined contribution retirement plans, an option for a 9/80 work schedule and an expense stipend for qualified applicants. Opportunities are available for those pursuing BS, MS and PhD degrees.

Co-op programs are approximately 30 weeks and run mid-January through early August. Internships are approximately 10-12 weeks and run mid-May through early August.

NNL Co-op and Internship positions have a unique opportunity to visit, and potentially tour, aircraft carriers, submarines, servicing facilities and other areas of interest at a shipyard near their work location. These tours cultivate a better appreciation of the important work NNL does and the key role the Navy plays in protecting the USA.
