

Atlas Graduate Program

Siemens Digital Industries Software is a global leader in the growing field of electrical design automation (EDA) software and services.

Siemens EDA, formerly known as Mentor Graphics, is the longest standing electronic design automation company in the world. Over the last 30 years, Siemens EDA has amassed the finest technology portfolio in the business. Our software tools span the full breadth semiconductor and electrical systems solutions including integrated circuit design and verification, PCB design of manufacturing solutions and embedded software.

We understand that graduating from your university and transitioning to full-time employment is an adjustment, so this program will help guide you. Through this program, new engineers will receive **12 months of developmental on the job training**, while working with Siemens EDA executives and world-class engineers. You will learn what it is like to work as part of a company that is solving software challenges in the area of electronic design automation.

Our collaborative environment supports you and encourages you to learn and work with some of the best and brightest in the industry and contribute directly to our software products, algorithms or existing code.

Program Requirements:

- Completed bachelor's degree in Computer Engineering, Computer Science, or Electrical Engineering
- Experience in C/C++, or Python
- Knowledge of SystemVerilog, Verilog, VHDL, FPGA, Tcl, Tk, Verification, Simulation, Data Structures, or Algorithms
- Open to relocation

Benefits and Perks:

- At Siemens Digital Industries Software we offer:
- Competitive Pay
- Performance-based incentive awards
- Medical, dental, and vision benefits
- 401 (k) matching and contribution
- Paid time off (PTO)
- Tuition reimbursement program
